Authors Index

A

Aadnoy, B.S. and Finjord, J.: *Discussion of Prefracture Testing in Tight Gas Reservoirs*, (Discussion SPE15913) SPEFE Dec., 86 628-629

Abbaszadeh-D., M. *et al.*: *Determination of Infinite-Acting Period for Well-Test Analysis*, (Tech. Paper SPE10763) SPEFE Aug., 86 383-388

Abdassah, D. and Ershaghi, I.: *Triple-Porosity Systems for Representing Naturally Fractured Reservoirs*, (Tech. Paper SPE13409) SPEFE Apr., 86 113-127

Abed, A.F. *et al.*: *Determination of Gas-Condensate Relative Permeability on Whole Cores Under Reservoir Conditions*, (Tech. Paper SPE11493) SPEFE Feb., 86 9-15

Advani, S. H. *et al.*: *Fluid Flow and Structural Response Modeling Associated With the Mechanics of Hydraulic Fracturing*, (Tech. Paper SPE10846) SPEFE June, 86 309-318

Ambastha, A.K.: *Discussion of Prefracture Testing in Tight Gas Reservoirs*, (Discussion SPE15964) SPEFE Dec., 86 630-631

Ayestaran, L. *et al.*: *Well Testing and Analysis Techniques for Layered Reservoirs*, (Tech. Paper SPE13081) SPEFE Aug., 86 342-354

Ayoub, J.A. and Ehlig-Economides, C.: *Vertical Interference Testing Across a Low-Permeability Zone*, (Tech. Paper SPE13251) SPEFE Oct., 86 497-510

B

Baker, P.L. and Kenyon, W.E.: *EPT Interpretation in Carbonates Drilled With Salt Muds*, (Tech. Paper SPE13192) SPEFE Oct., 86 521-531

Barnes, J.R. *et al.*: *Discrimination of Crude Oil and Water in Sand and in Bore Cores With NMR Imaging*, (Tech. Paper SPE13401) SPEFE Feb., 86 31-34

Barroux, C. *et al.*: *Determination of Gas-Condensate Relative Permeability on Whole Cores Under Reservoir Conditions*, (Tech. Paper SPE11493) SPEFE Feb., 86 9-15

Bennett, C. O. *et al.*: *Performance of Finite-Conductivity, Vertically Fractured Wells in Single-Layer Reservoirs*, (Tech. Paper SPE11029) SPEFE Aug., 86 399-412

Bennett, C.O. and Pollock, C.B.: *Eight-Well Interference Test in Anschutz Ranch East Field*, (Tech. Paper SPE11968) SPEFE Dec., 86 547-556

Bennett, C.O. *et al.*: *Analysis of Finite-Conductivity Fractures Intercepting Multilayer Commingled Reservoirs*, (Tech. Paper SPE11030) SPEFE June, 86 259-274

Benson, S. M. and Bodvarsson, G. S.: *Nonisothermal Effects During Injection and Falloff Tests*, (Tech. Paper SPE11137) SPEFE Feb., 86 53-63

Benson, S.M. and Lai, C.H.: *Analysis of Interference Data in a Highly Heterogeneous Naturally Fractured Geothermal Reservoir*, (Tech. Paper SPE13252) SPEFE June, 86 236-248

Blackband, S. *et al.*: *Discrimination of Crude Oil and Water in Sand and in Bore Cores With NMR Imaging*, (Tech. Paper SPE13401) SPEFE Feb., 86 31-34

Bodvarsson, G. S. and Benson, S. M.: *Nonisothermal Effects During Injection and Falloff Tests*, (Tech. Paper SPE11137) SPEFE Feb., 86 53-63

Brockenbrough, J.R. and Lee, S.T.: *A New Approximate Analytic Solution for Finite-Conductivity Vertical Fractures*, (Tech. Paper SPE12013) SPEFE Feb., 86 75-88

Brower, K.R. *et al.*: *Effect of Fluid, Confining Pressure, and Temperature on Absolute Permeabilities of Low-Permeability Sandstones*, (Tech. Paper SPE13093) SPEFE Aug., 86 413-423

Brown, S. L. *et al.*: *Determination of Infinite-Acting Period for Well-Test Analysis*, (Tech. Paper SPE10763) SPEFE Aug., 86 383-388

C

Carter, R.D. and Chopra, A.K.: *Proof of the Two-Phase Steady-State Theory for Flow Through Porous Media*, (Tech. Paper SPE14472) SPEFE Dec., 86 603-608

Caudle, B. H. and Ichara, M. J.: *Pressure Transient Analysis in Poorly Consolidated Reservoirs*, (Tech. Paper SPE10086) SPEFE Dec., 86 557-570

Chen, J. and Wada, N.: *A New Technique for Visualizing the Distribution of Oil, Water, and Quartz Grains in a Transparent, Three-Dimensional, Porous Medium*, (Tech. Paper SPE13349) SPEFE Apr., 86 205-208

Chopra, A.K. and Carter, R.D.: *Proof of the Two-Phase Steady-State Theory for Flow Through Porous Media*, (Tech. Paper SPE14472) SPEFE Dec., 86 603-608

Chu, W. C. *et al.*: *Pressure Transient Analysis of Two-Phase Flow Problems*, (Tech. Paper SPE10223) SPEFE Apr., 86 151-164

Cinco-Ley, H. *et al.*: *Application of the Pressure-Derivative Function in the Pressure-Transient Testing of Fractured Wells*, (Tech. Paper SPE13056) SPEFE Oct., 86 470-480

Clague, A.D.H. *et al.*: *Discrimination of Crude Oil and Water in Sand and in Bore Cores With NMR Imaging*, (Tech. Paper SPE13401) SPEFE Feb., 86 31-34

Coates, J.A. *et al.*: *Development of a Fluorimetric Method for Detection of Pay Zones During Drilling With Invert Muds*, (Tech. Paper SPE13005) SPEFE Dec., 86 595-602

Connell, D.L. *et al.*: *Development of a Fluorimetric Method for Detection of Pay Zones During Drilling With Invert Muds*, (Tech. Paper SPE13005) SPEFE Dec., 86 595-602

D

Davarzani, M.J. and Knight, B.L.: *Injection Well Logging Using Viscous EOR Fluids*, (Tech. Paper SPE13143) SPEFE June, 86 300-308

Dawe, R.A. and Mahers, E.G.: *Gravitational Effects During Diffusional Mass Transfer at the Pore Scale*, (Tech. Paper SPE12679) SPEFE Apr., 86 184-192

Deans, H.A. and Mut, A.D.: *Alcohol Extraction Technique for In-Situ Determination of Resident Water Saturation and Resident Brine Salinity*, (Tech. Paper SPE12094) SPEFE Aug., 86 372-382

Dembicki Jr., H.: *Oil Show Detection by C5+ Hydrocarbon Mud Logging*, (Tech. Paper SPE13948) SPEFE Aug., 86 331-334

E

Ehlig-Economides, C. and Ayoub, J.A.: *Vertical Interference Testing Across a Low-Permeability Zone*, (Tech. Paper SPE13251) SPEFE Oct., 86 497-510

El-Khatib, N.: *Discussion of a Test for Detecting Rock Property Nonuniformities in Core Samples*, (Discussion SPE15342) SPEFE Aug., 86 424-425

Elbel, J. L. *et al.*: *Performance of Finite-Conductivity, Vertically Fractured Wells in Single-Layer Reservoirs*, (Tech. Paper SPE11029) SPEFE Aug., 86 399-412

Ershaghi, I. and Abdassah, D.: *Triple-Porosity Systems for Representing Naturally Fractured Reservoirs*, (Tech. Paper SPE13409) SPEFE Apr., 86 113-127

Ertekin, T. *et al.*: *Numerical Simulation of the Transient Behavior of Coal-Seam Degasification Wells*, (Tech. Paper SPE12258) SPEFE Apr., 86 165-183

Ertekin, T. *et al.*: *Dynamic Gas Slippage: A Unique Dual-Mechanism Approach to the Flow of Gas in Tight Formations*, (Tech. Paper SPE12045) SPEFE Feb., 86 43-52

Evans, H.E. *et al.*: *Surface Composition of Berea Sandstone*, (Tech. Paper SPE11972) SPEFE Feb., 86 23-30

Subject Index

A

Alcohol
Extraction technique: for in-situ determination of resident water saturation and resident brine salinity, (Tech. Paper SPE 12094) SPEFE Aug. 86, 372-382

Analytical Methods
Analysis of finite-conductivity fractures intercepting multilayer commingled reservoirs, (Tech. Paper SPE 11030) SPEFE Jun. 86, 259-274

Anschutz Ranch East Field
See Utah and Wyoming

Aquifers
Groundwater movement in: hydrodynamic conditions of hydrocarbon accumulation exemplified by carboniferous formation; Lublin synclinorium, Poland, (Tech. Paper SPE 13345) SPEFE Jun. 86, 286-294

Auger Electron Spectroscopy(AES)
Surface composition determination: Berea sandstone, (Tech. Paper SPE 11972) SPEFE Feb. 86, 23-30

B

Boreholes
Capture cross section: variation with thermal neutron decay time: computing environmental effects using Monte Carlo techniques, (Tech. Paper SPE 10293) SPEFE Feb. 86, 35-42

Brines
Resident salinity: and resident water saturation; alcohol extraction technique for in-situ determination of, (Tech. Paper SPE 12094) SPEFE Aug. 86, 372-382

Buildup Curves
Analysis of two-phase flow problems, (Tech. Paper SPE 10223) SPEFE Apr. 86, 151-164
Tight gas reservoirs: prefracture testing in, (Tech. Paper SPE 12918) SPEFE Apr. 86, 128-138
Tight gas reservoirs: prefracture testing in; author's reply to discussion of, (Rebuttal SPE 15989) SPEFE Dec. 86, 1
Tight gas reservoirs: prefracture testing in; discussion of, (Discussion SPE 15913) SPEFE Dec. 86, 628-629
Tight gas reservoirs: prefracture testing in; discussion of, (Discussion SPE 15964) SPEFE Dec. 86, 630-631

C

California
East Mesa field: injection and falloff tests; nonisothermal effects during, (Tech. Paper SPE 11137) SPEFE Feb. 86, 53-63

Canada
Pressure-transient testing: of fractured wells; application of pressure-derivative function, (Tech. Paper SPE 13056) SPEFE Oct. 86, 470-480

Capillary Number
Measurement: effect of crude-oil-induced wettability changes on oil recovery, (Tech. Paper SPE 13215) SPEFE Feb. 86, 89-103

Carbonate Reservoirs
Core plugs from: mechanical degradation of polyacrylamide solutions in, (Tech. Paper SPE 12651) SPEFE Apr. 86, 139-150

Carbonates
Drilled with salt muds: EPT interpretation in, (Tech. Paper SPE 13192) SPEFE Oct. 86, 521-531

Cement Bond Logging
Fluid-compensated, (Tech. Paper SPE 13044) SPEFE Aug. 86, 335-341

Characterization
Of pore space by quantitative image analysis, (Tech. Paper SPE 13133) SPEFE Aug. 86, 389-398
Of reservoir by mineralogical and petrophysical data: Tuscaloosa sand, (Tech. Paper SPE 14274) SPEFE Dec. 86, 584-594

Chromatography
Gas: oil show detection by C5+ hydrocarbon mud logging, (Tech. Paper SPE 13948) SPEFE Aug. 86, 331-334

Coals
Seam: degasification wells; numerical simulation of transient behavior, (Tech. Paper SPE 12258) SPEFE Apr. 86, 165-183

Colorado
Codell sandstone, Weld and Larimer Counties, Co.; geological aspects of, (Tech. Paper SPE 13885) SPEFE Dec. 86, 623-627
Piceance Creek basin: laboratory drying procedures and permeability of tight sandstone core, (Tech. Paper SPE 11622) SPEFE Feb. 86, 16-22
Submillidarcy sandstone reservoirs: log analysis techniques for quantifying permeability, (Tech. Paper SPE 13880) SPEFE Dec. 86, 609-622

Compaction
Of sediments during burial: preservation of primary porosity through hydrocarbon entrapment, (Tech. Paper SPE 13954) SPEFE Jun. 86, 295-299

Condensates
Gas: determination of relative permeability on whole cores under reservoir conditions, (Tech. Paper SPE 11493) SPEFE Feb. 86, 9-15

Conductivity
Finite vertical fracture: new approximate analytic solution, (Tech. Paper SPE 12013) SPEFE Feb. 86, 75-88
Finite: of fractures: analysis of intercepting multilayer commingled reservoirs, (Tech. Paper SPE 11030) SPEFE Jun. 86, 259-274
Finite: performance of vertically fractured wells in single-layer reservoirs, (Tech. Paper SPE 11029) SPEFE Aug. 86, 399-412

Contact Angle
Measurement: effect of crude-oil-induced wettability changes on oil recovery, (Tech. Paper SPE 13215) SPEFE Feb. 86, 89-103

Cores
Bore: discrimination of crude oil and water with NMR imaging, (Tech. Paper SPE 13401) SPEFE Feb. 86, 31-34
Estimating subsurface fracture density in: effects resulting from variable fracture spacing, (Tech. Paper SPE 13300) SPEFE Jun. 86, 249-258
Plugs from several carbonate reservoirs: mechanical degradation of polyacrylamide solutions, (Tech. Paper SPE 12651) SPEFE Apr. 86, 139-150
Samples: detecting rock property nonuniformities; test for; author's reply to discussion of, (Rebuttal SPE 15842) SPEFE Aug. 86, 425
Samples: detecting rock property nonuniformities; test for; discussion of, (Discussion SPE 15342) SPEFE Aug. 86, 424-425
Sandstone, tight: permeability of and laboratory drying procedures, (Tech. Paper SPE 11622) SPEFE Feb. 86, 16-22
Water-wet: effect of crude-oil-induced wettability change on oil recovery, (Tech. Paper SPE 13215) SPEFE Feb. 86, 89-103
Whole: determination of relative permeability under reservoir conditions, (Tech. Paper SPE 11493) SPEFE Feb. 86, 9-15

Critical Saturation
Gas condensate: determination of relative permeability on whole cores under reservoir conditions, (Tech. Paper SPE 11493) SPEFE Feb. 86, 9-15

Cross Flow
Between contiguous layers: interpretation of pulse tests in reservoirs, (Tech. Paper SPE 11963) SPEFE Oct. 86, 511-520

Crude Oils
And water: discrimination in sand and in bore cores with NMR imaging, (Tech. Paper SPE 13401) SPEFE Feb. 86, 31-34
Induced wettability changes: effect on oil recovery, (Tech. Paper SPE 13215) SPEFE Feb. 86, 89-103

D

Data
Interference: analysis in highly heterogeneous naturally fractured geothermal reservoir, (Tech. Paper SPE 13252) SPEFE Jun. 86, 236-248
Mineralogical and petrophysical: reservoir characterization of Tuscaloosa sand by, (Tech. Paper SPE 14274) SPEFE Dec. 86, 584-594
Pressure buildup: analysis influenced by wellbore phase redistribution, (Tech. Paper SPE 12782) SPEFE Oct. 86, 435-452
Variable-rate well-test pressure: analysis using Duhamel's principle, (Tech. Paper SPE 13080) SPEFE Oct. 86, 453-469
Degasification
Wells: numerical simulation of transient behavior of coal seams, (Tech. Paper SPE 12258) SPEFE Apr. 86, 165-183
Degradation
Mechanical: of polyacrylamide solutions in core plugs from several carbonate reservoirs, (Tech. Paper SPE 12651) SPEFE Apr. 86, 139-150
Density
Subsurface fracture: estimating in core; effects resulting from variable fracture spacing, (Tech. Paper SPE 13300) SPEFE Jun. 86, 249-258
Density Logging
Use in triple-fluid evaluations, (Tech. Paper SPE 13301) SPEFE Apr. 86, 193-204
Detection
Of pay zones during drilling with inverted muds: development of fluorimetric method for, (Tech. Paper SPE 13005) SPEFE Dec. 86, 595-602
Oil show: by C5+ hydrocarbon mud logging, (Tech. Paper SPE 13948) SPEFE Aug. 86, 331-334
Developments
Of fluorimetric method: detection of pay zones during drilling with inverted muds, (Tech. Paper SPE 13005) SPEFE Dec. 86, 595-602
Diffusion
Mass transfer at the pore scale: gravitational effects during, (Tech. Paper SPE 12679) SPEFE Apr. 86, 184-192
Diffusivity
Equations: solved in type-curve matching techniques with error sensitivity numbers, (Tech. Paper SPE 10087) SPEFE Feb. 86, 64-74
Displacement Efficiency
Microscopic: effect of crude-oil-induced wettability changes on oil recovery, (Tech. Paper SPE 13215) SPEFE Feb. 86, 89-103
Distribution
Of oil, water, and quartz grains in a transparent, three-dimensional, porous medium; new technique for visualizing, (Tech. Paper SPE 13349) SPEFE Apr. 86, 205-208
Drawdown Analyses
Naturally fractured reservoirs; triple-porosity system for representing, (Tech. Paper SPE 13409) SPEFE Apr. 86, 113-127
Of two-phase flow problems, (Tech. Paper SPE 10223) SPEFE Apr. 86, 151-164
Of well test: determination of infinite-acting period, (Tech. Paper SPE 10763) SPEFE Aug. 86, 383-388
Tight gas reservoirs: prefracture testing in, (Tech. Paper SPE 12918) SPEFE Apr. 86, 128-138
Tight gas reservoirs: prefracture testing in; author's reply to discussion of, (Rebuttal SPE 15989) SPEFE Dec. 86, 1
Tight gas reservoirs: prefracture testing in; discussion of, (Discussion SPE 15913) SPEFE Dec. 86, 628-629
Tight gas reservoirs: prefracture testing in; discussion of, (Discussion SPE 15964) SPEFE Dec. 86, 630-631
Drawdown Tests
Effect of stress-dependent permeability, (Tech. Paper SPE 11220) SPEFE Jun. 86, 227-235
Drilling
With inverted muds: development of fluorimetric method for detection of pay zones, (Tech. Paper SPE 13005) SPEFE Dec. 86, 595-602
Duhamel's Principle
Use in analysis of variable-rate well-test pressure data, (Tech. Paper SPE 13080) SPEFE Oct. 86, 453-469
Dynamics
Of gas slippage: unique dual-mechanism approach to flow of gas in tight formations, (Tech. Paper SPE 12045) SPEFE Feb. 86, 43-52

E

East Mesa Field
See California
Electromagnetic Propagation Tool
And density and neutron logs: use in triple-fluid evaluations, (Tech. Paper SPE 13301) SPEFE Apr. 86, 193-204
Interpretation in carbonates drilled with salt muds, (Tech. Paper SPE 13192) SPEFE Oct. 86, 521-531
Enhanced Recovery
Experiments: test for detecting rock property nonuniformities in core samples; author's reply to discussion of, (Rebuttal SPE 15842) SPEFE Aug. 86, 425
Experiments: test for detecting rock property nonuniformities in core samples; discussion of, (Discussion SPE 15342) SPEFE Aug. 86, 424-425
Triple-fluid evaluations using density, neutron, and electromagnetic propagation logs, (Tech. Paper SPE 13301) SPEFE Apr. 86, 193-204
Viscous fluids: injection well logging using, (Tech. Paper SPE 13143) SPEFE Jun. 86, 300-308
Environmental Effects
Computing thermal neutron decay time using Monte Carlo techniques, (Tech. Paper SPE 10293) SPEFE Feb. 86, 35-42
Equipment
Image analysis: use in characterization of pore space, (Tech. Paper SPE 13133) SPEFE Aug. 86, 389-398
Swing arm trace tool: injection well logging using viscous EOR fluids, (Tech. Paper SPE 13143) SPEFE Jun. 86, 300-308
Error Sensitivity Numbers
Type-curve matching techniques with, (Tech. Paper SPE 10087) SPEFE Feb. 86, 64-74
Evaluations
Triple-fluid: using density, neutron, and electromagnetic propagation logs, (Tech. Paper SPE 13301) SPEFE Apr. 86, 193-204
Extraction
Alcohol: technique for in-situ determination of resident water saturation and resident brine salinity, (Tech. Paper SPE 12094) SPEFE Aug. 86, 372-382
Thermal: oil show detection by C5+ hydrocarbon mud logging, (Tech. Paper SPE 13948) SPEFE Aug. 86, 331-334

F

Faults
And pinchouts: modeling of; and local mesh refinement, (Tech. Paper SPE 13524) SPEFE Jun. 86, 275-285

Field Applications
Of Duhamel's principle: analysis of variable-rate well-test pressure data, (Tech. Paper SPE 13080) SPEFE Oct. 86, 453-469
Of buildup tests with short producing time, (Tech. Paper SPE 11083) SPEFE Aug. 86, 363-371
Of triple-fluid evaluations: using density, neutron, and electromagnetic propagation logs, (Tech. Paper SPE 13301) SPEFE Apr. 86, 193-204
Field Tests
Using simultaneous downhole flow-rate and pressure measurements to improve analysis of well tests, (Tech. Paper SPE 12958) SPEFE Jun. 86, 217-226
Well interference: eight-well test; Anschutz Ranch East field, (Tech. Paper SPE 11968) SPEFE Dec. 86, 547-556
Finite Difference Method
For performance of finite-conductivity, vertically fractured wells; single-layer reservoirs, (Tech. Paper SPE 11029) SPEFE Aug. 86, 399-412
Finite Element Method
Use in fluid flow and structural response modeling associated with mechanics of hydraulic fracturing, (Tech. Paper SPE 10846) SPEFE Jun. 86, 309-318
Flow Rate
Downhole measurements: using simultaneously with pressure measurements to improve analysis of well tests, (Tech. Paper SPE 12958) SPEFE Jun. 86, 217-226
Fluid Flow
And structural response modeling associated with mechanics of hydraulic fracturing, (Tech. Paper SPE 10846) SPEFE Jun. 86, 309-318
In a transparent, three-dimensional, porous medium: new technique for visualizing distribution of oil, water, and quartz grains, (Tech. Paper SPE 13349) SPEFE Apr. 86, 205-208
Infinite-acting period: determination for well-test analysis, (Tech. Paper SPE 10763) SPEFE Aug. 86, 383-388
Low-permeability zone: vertical interference testing across, (Tech. Paper SPE 13251) SPEFE Oct. 86, 497-510
Miscible: gravitational effects during diffusional mass transfer at the pore scale, (Tech. Paper SPE 12679) SPEFE Apr. 86, 184-192
Of gas in tight formations: dynamic gas slippage; unique dual-mechanism approach, (Tech. Paper SPE 12045) SPEFE Feb. 86, 43-52
Through porous media: proof of two-phase steady-state theory, (Tech. Paper SPE 14472) SPEFE Dec. 86, 603-608
Two-phase problems: pressure transient analysis of, (Tech. Paper SPE 10223) SPEFE Apr. 86, 151-164
Fluorimetry
Development of method for detection of pay zones during drilling with inverted muds, (Tech. Paper SPE 13005) SPEFE Dec. 86, 595-602
Formation Fractures
Estimating subsurface density in core: effects resulting from variable fracture spacing, (Tech. Paper SPE 13300) SPEFE Jun. 86, 249-258
Finite-conductivity vertical: new approximate analytic solution, (Tech. Paper SPE 12013) SPEFE Feb. 86, 75-88
Finite-conductivity: analysis of intercepting multilayer commingled reservoirs, (Tech. Paper SPE 11030) SPEFE Jun. 86, 259-274
Geothermal reservoir: highly heterogeneous; analysis of interference data, (Tech. Paper SPE 13252) SPEFE Jun. 86, 236-248
In wells: pressure-transient testing; application of pressure-derivative function, (Tech. Paper SPE 13056) SPEFE Oct. 86, 470-480
Naturally occurring: triple-porosity systems for representing reservoirs, (Tech. Paper SPE 13409) SPEFE Apr. 86, 113-127
Prefracture testing: tight gas reservoirs, (Tech. Paper SPE 12918) SPEFE Apr. 86, 128-138
Prefracture testing: tight gas reservoirs; author's reply to discussion of, (Rebuttal SPE 15989) SPEFE Dec. 86, 1
Prefracture testing: tight gas reservoirs; discussion of, (Discussion SPE 15913) SPEFE Dec. 86, 628-629
Prefracture testing: tight gas reservoirs; discussion of, (Discussion SPE 15964) SPEFE Dec. 86, 630-631
Formation Fracturing
Mechanics of hydraulic type: fluid flow and structural response modeling associated with, (Tech. Paper SPE 10846) SPEFE Jun. 86, 309-318
Pressure decline: general analysis with application to three models, (Tech. Paper SPE 12941) SPEFE Dec. 86, 571-583
Fractured Reservoirs or Fracturing
Geothermal: highly heterogeneous; analysis of interference data, (Tech. Paper SPE 13252) SPEFE Jun. 86, 236-248
Naturally: triple-porosity systems for representing, (Tech. Paper SPE 13409) SPEFE Apr. 86, 113-127
Pressure decline: general analysis with application to three models, (Tech. Paper SPE 12941) SPEFE Dec. 86, 571-583
Fractures
Finite-conductivity vertical: new approximate analytic solution, (Tech. Paper SPE 12013) SPEFE Feb. 86, 75-88
In wells: pressure-transient testing; application of pressure-derivative function, (Tech. Paper SPE 13056) SPEFE Oct. 86, 470-480
Vertical, finite-conductivity: performance of fractured wells in single-layer reservoirs, (Tech. Paper SPE 11029) SPEFE Aug. 86, 399-412
Vertical: nonlinear inversion of pressure-transient data, (Tech. Paper SPE 12848) SPEFE Aug. 86, 355-362

G

Gas Condensates
Relative permeability: determination on whole cores under reservoir conditions, (Tech. Paper SPE 11493) SPEFE Feb. 86, 9-15
Single-well system: proof of two-phase steady-state theory for flow through porous media, (Tech. Paper SPE 14472) SPEFE Dec. 86, 603-608
Gas Production
Effect of stress-dependent permeability, (Tech. Paper SPE 11220) SPEFE Jun. 86, 227-235
Gas Reservoirs
Tight: prefracture testing, (Tech. Paper SPE 12918) SPEFE Apr. 86, 128-138
Tight: prefracture testing; author's reply to discussion of, (Rebuttal SPE 15989) SPEFE Dec. 86, 1
Tight: prefracture testing; discussion of, (Discussion SPE 15964) SPEFE Dec. 86, 630-631
Gas Slippage
Dynamic: unique dual-mechanism approach to flow of gas in tight formations, (Tech. Paper SPE 12045) SPEFE Feb. 86, 43-52
Geological Study
Codell sandstone, Weld and Larimer Counties, Co., (Tech. Paper SPE 13885) SPEFE Dec. 86, 623-627
Geothermal Reservoir
Highly heterogeneous naturally fractured: analysis of interference data, (Tech. Paper SPE 13252) SPEFE Jun. 86, 236-248
Geothermal Wells
Injection and falloff tests: nonisothermal effects during, (Tech. Paper SPE 11137) SPEFE Feb. 86, 53-63
Graphical Analysis
Of buildup tests with short producing time, (Tech. Paper SPE 11083) SPEFE Aug. 86, 363-371
Of well test: determination of infinite-acting period, (Tech. Paper SPE 10763) SPEFE Aug. 86, 383-388

Ground Water
Movement: Lublin synclinorium, Poland; hydrodynamic conditio .s of hydrocarbon accumulation exemplified by carboniferous formation, (Tech. Paper SPE 13345) SPEFE Jun. 86, 286-294

H

Heterogeneity
In core samples: test for detecting rock property nonuniformities; author's reply to discussion of, (Rebuttal SPE 15842) SPEFE Aug. 86, 425
In core samples: test for detecting rock property nonuniformities; discussion of, (Discussion SPE 15342) SPEFE Aug. 86, 424-425
Holographic Inferometry
Diffusional mass transfer at the pore scale; gravitational effects during, (Tech. Paper SPE 12679) SPEFE Apr. 86, 184-192
Hydrocarbon Analysis
C5+ mud logging: oil show detection, (Tech. Paper SPE 13948) SPEFE Aug. 86, 331-334
Hydrocarbons
Accumulation: hydrodynamic conditions exemplified by carboniferous formation; Lublin synclinorium, Poland, (Tech. Paper SPE 13345) SPEFE Jun. 86, 286-294
Entrapment during burial: preservation of primary porosity, (Tech. Paper SPE 13954) SPEFE Jun. 86, 295-299
Hydrodynamics
Conditions of hydrocarbon accumulation exemplified by carboniferous formation: Lublin synclinorium, Poland, (Tech. Paper SPE 13345) SPEFE Jun. 86, 286-294

I

Imagery
NMR techniques: discrimination of crude oil and water in sand and in bore cores, (Tech. Paper SPE 13401) SPEFE Feb. 86, 31-34
Quantitative . alysis: characterization of pore space, (Tech. Paper SPE 13133) SPEFE Aug. 86, 389-398
Injection
Test: nonisothermal effects during, (Tech. Paper SPE 11137) SPEFE Feb. 86, 53-63
Well logging using viscous EOR fluids, (Tech. Paper SPE 13143) SPEFE Jun. 86, 300-308
Interference
Data: analysis in highly heterogeneous naturally fractured geothermal reservoir, (Tech. Paper SPE 13252) SPEFE Jun. 86, 236-248
Eight-well test: Anschutz Ranch East field, (Tech. Paper SPE 11968) SPEFE Dec. 86, 547-556
Testing, vertical: across low-permeability zone, (Tech. Paper SPE 13251) SPEFE Oct. 86, 497-510
Two-well: determination of infinite-acting period for well-test analysis, (Tech. Paper SPE 10763) SPEFE Aug. 86, 383-388
Interpretation
EPT: carbonates drilled with salt muds, (Tech. Paper SPE 13192) SPEFE Oct. 86, 521-531
Of pulse tests: reservoirs with crossflow between contiguous layers, (Tech. Paper SPE 11963) SPEFE Oct. 86, 511-520
Inversion
Nonlinear: of pressure-transient data, (Tech. Paper SPE 12848) SPEFE Aug. 86, 355-362

L

Laboratory Studies
Carbonates drilled with salt muds: EPT interpretation in, (Tech. Paper SPE 13192) SPEFE Oct. 86, 521-531
Diffusional mass transfer at the pore scale; gravitational effects during, (Tech. Paper SPE 12679) SPEFE Apr. 86, 184-192
Distribution of oil, water, and quartz grains in a transparent, three-dimensional, porous medium; new technique for visualizing, (Tech. Paper SPE 13349) SPEFE Apr. 86, 205-208
Drying procedures: permeability of tight sandstone cores, (Tech. Paper SPE 11622) SPEFE Feb. 86, 16-22
Effect of fluid, confining pressure, and temperature on absolute permeabilities: low-permeability sandstones, (Tech. Paper SPE 13093) SPEFE Aug. 86, 413-423
In-situ stresses: estimation from ultrasonic measurements, (Tech. Paper SPE 12850) SPEFE Oct. 86, 532-538
Mechanical degradation: of polyacrylamide solutions in core plugs from several carbonate reservoirs, (Tech. Paper SPE 12651) SPEFE Apr. 86, 139-150
Of mineralogical and petrophysical data: reservoir characterization of Tuscaloosa sand, (Tech. Paper SPE 14274) SPEFE Dec. 86, 584-594
Surface composition of Berea sandstone, (Tech. Paper SPE 11972) SPEFE Feb. 86, 23-30
Least Squares
Data inversion and nonlinear: pressure-transient data, (Tech. Paper SPE 12848) SPEFE Aug. 86, 355-362
Lithology
Of Codell sandstone: Weld and Larimer Counties, Co., (Tech. Paper SPE 13885) SPEFE Dec. 86, 623-627
Log Interpretation
Injection well logging: use of viscous EOR fluids, (Tech. Paper SPE 13143) SPEFE Jun. 86, 300-308
Logging
Thermal neutron decay time: computing environmental effects using Monte Carlo techniques, (Tech. Paper SPE 10293) SPEFE Feb. 86, 35-42

M

Mass Transfer
Diffusional: at the pore scale; gravitational effects during, (Tech. Paper SPE 12679) SPEFE Apr. 86, 184-192
Matrix
Solution method: local mesh refinement and modeling of faults and pinchouts, (Tech. Paper SPE 13524) SPEFE Jun. 86, 275-285
Measurement
Pressure: using simultaneously with downhole flow-rate to improve analysis of well tests, (Tech. Paper SPE 12958) SPEFE Jun. 86, 217-226
Thermal neutron decay time: computing environmental effects using Monte Carlo techniques, (Tech. Paper SPE 10293) SPEFE Feb. 86, 35-42
Ultrasonic: estimation of in-situ stresses around wellbore, (Tech. Paper SPE 12850) SPEFE Oct. 86, 532-538
Middle East
Gas-condensate relative permeability: determination on whole cores under reservoir conditions, (Tech. Paper SPE 11493) SPEFE Feb. 86, 9-15
Models
Bimodal: for EPT interpretation; carbonates drilled in salt muds, (Tech. Paper SPE 13192) SPEFE Oct. 86, 521-531
Composite and naturally fractured geothermal reservoir: analysis of interference data, (Tech. Paper SPE 13252) SPEFE Jun. 86, 236-248
Fick's law of diffusion: dynamic gas slippage; unique dual-mechanism approach to flow of gas in tight formations, (Tech. Paper SPE 12045) SPEFE Feb. 86, 43-52
Finite-difference: numerical simulation of transient behavior of coal-seam degasification wells, (Tech. Paper SPE 12258) SPEFE Apr. 86, 165-183
Mathematical: effects of wellbore storage and skin on vertical-permeability testing, (Tech. Paper SPE 13250) SPEFE Oct. 86, 481-496
Mathematical: for analysis of buildup tests with short producing time, (Tech. Paper SPE 11083) SPEFE Aug. 86, 363-371

Mathematical: mechanics of hydraulic fracturing; fluid flow and structural response modeling associated with, (Tech. Paper SPE 10846) SPEFE Jun. 86, 309-318
Mathematical: of type-curve matching techniques with error sensitivity numbers, (Tech. Paper SPE 10087) SPEFE Feb. 86, 64-74
Mathematical: performance of finite-conductivity, vertically fractured wells; single-layer reservoirs, (Tech. Paper SPE 11029) SPEFE Aug. 86, 399-412
Mathematical: preservation of primary porosity through hydrocarbon entrapment during burial, (Tech. Paper SPE 13954) SPEFE Jun. 86, 295-299
Mathematical: pressure transient analysis of two-phase flow problems, (Tech. Paper SPE 10223) SPEFE Apr. 86, 151-164
Mathematical: reservoirs with crossflow between contiguous layers; interpretation of pulse tests, (Tech. Paper SPE 11963) SPEFE Oct. 86, 511-520
Mathematical: vertical interference testing across low-permeability zone, (Tech. Paper SPE 13251) SPEFE Oct. 86, 497-510
Micro: diffusional mass transfer at the pore scale; gravitational effects during, (Tech. Paper SPE 12679) SPEFE Apr. 86, 184-192
Numerical: analysis of finite-conductivity fractures intercepting multilayer commingled reservoirs, (Tech. Paper SPE 11030) SPEFE Jun. 86, 259-274
Numerical: injection and falloff tests; nonisothermal effects during, (Tech. Paper SPE 11137) SPEFE Feb. 86, 53-63
Numerical: pressure transient analysis in poorly consolidated reservoirs, (Tech. Paper SPE 10086) SPEFE Dec. 86, 557-570
Of faults and pinchouts: and local mesh refinement, (Tech. Paper SPE 13524) SPEFE Jun. 86, 275-285
Physical and numerical: to study wellbore fluid effects; fluid-compensated cement bond log, (Tech. Paper SPE 13044) SPEFE Aug. 86, 335-341
Reservoir: nonlinear inversion of pressure-transient data, (Tech. Paper SPE 12848) SPEFE Aug. 86, 355-362
Strata blocks: triple-porosity systems for representing naturally fractured reservoirs, (Tech. Paper SPE 13409) SPEFE Apr. 86, 113-127
Three fracture: general analysis of fracturing pressure decline, (Tech. Paper SPE 12941) SPEFE Dec. 86, 571-583
Trilinear fracture formation flow: new approximate analytic solution for finite-conductivity vertical fracture, (Tech. Paper SPE 12013) SPEFE Feb. 86, 75-88

Monte Carlo Techniques
Use in computing thermal neutron decay time environmental effects, (Tech. Paper SPE 10293) SPEFE Feb. 86, 35-42

Mud Logging
C5+ hydrocarbon: oil show detection by, (Tech. Paper SPE 13948) SPEFE Aug. 86, 331-334

Mud Systems
Inverted: development of fluorimetric method for detection of pay zones during drilling, (Tech. Paper SPE 13005) SPEFE Dec. 86, 595-602

N

Natural Gas
Dynamic slippage: unique dual-mechanism approach to flow of gas in tight formations, (Tech. Paper SPE 12045) SPEFE Feb. 86, 43-52

Neutron Logging
Use in triple-fluid evaluations, (Tech. Paper SPE 13301) SPEFE Apr. 86, 193-204

Non-Newtonian Systems
Vertical, testing: effects of wellbore storage and skin, (Tech. Paper SPE 13250) SPEFE Oct. 86, 481-496

Nuclear Magnetic Resonance
Imaging: discrimination of crude oil and water in sand and in bore cores, (Tech. Paper SPE 13401) SPEFE Feb. 86, 31-34

Numerical Solutions
Analysis of finite-conductivity fractures intercepting multilayer commingled reservoirs, (Tech. Paper SPE 11030) SPEFE Jun. 86, 259-274
Analysis of pressure buildup data: influence of wellbore phase redistribution, (Tech. Paper SPE 12782) SPEFE Oct. 86, 435-452
Analysis of variable-rate well-test pressure data using Duhamel's principle, (Tech. Paper SPE 13080) SPEFE Oct. 86, 453-469
Dynamic gas slippage: unique dual-mechanism approach to flow of gas in tight formations, (Tech. Paper SPE 12045) SPEFE Feb. 86, 43-52
Estimating subsurface fracture density in core: effects resulting from variable fracture spacing, (Tech. Paper SPE 13300) SPEFE Jun. 86, 249-258
Finite-conductivity vertical fractures, (Tech. Paper SPE 12013) SPEFE Feb. 86, 75-88
Flow through porous media: proof of two-phase steady-state theory, (Tech. Paper SPE 14472) SPEFE Dec. 86, 603-608
Fracturing pressure decline: general analysis with application to three models, (Tech. Paper SPE 12941) SPEFE Dec. 86, 571-583
Groundwater movement: hydrodynamic conditions of hydrocarbon accumulation exemplified by carboniferous formation; Lublin synclinorium, Poland, (Tech. Paper SPE 13345) SPEFE Jun. 86, 286-294
In-situ stresses: estimation from ultrasonic measurements, (Tech. Paper SPE 12850) SPEFE Oct. 86, 532-538
Mechanics of hydraulic fracturing: fluid flow and structural response modeling associated with, (Tech. Paper SPE 10846) SPEFE Jun. 86, 309-318
Of analysis of buildup tests with short producing time, (Tech. Paper SPE 11083) SPEFE Aug. 86, 363-371
Performance of finite conductivity, vertically-fractured wells: single-layer reservoirs, (Tech. Paper SPE 11029) SPEFE Aug. 86, 399-412
Preservation of primary porosity through hydrocarbon entrapment during burial, (Tech. Paper SPE 13954) SPEFE Jun. 86, 295-299
Pressure transient analysis: poorly consolidated reservoirs, (Tech. Paper SPE 10086) SPEFE Dec. 86, 557-570
Simulation of transient behavior of coal-seam degasification wells, (Tech. Paper SPE 12258) SPEFE Apr. 86, 165-183
Type curve matching techniques with error sensitivity numbers, (Tech. Paper SPE 10087) SPEFE Feb. 86, 64-74
Using simultaneous downhole flow-rate and pressure measurements to improve analysis of well tests, (Tech. Paper SPE 12958) SPEFE Jun. 86, 217-226
Vertical interference testing across low-permeability zone, (Tech. Paper SPE 13251) SPEFE Oct. 86, 497-510

O

Oil
Distribution with water and quartz grains in a transparent, three-dimensional, porous medium: new technique for visualizing, (Tech. Paper SPE 13349) SPEFE Apr. 86, 205-208
Show: detection by C5+ hydrocarbon mud logging, (Tech. Paper SPE 13948) SPEFE Aug. 86, 331-334

Oil Recovery
Effect of crude-oil-induced wettability changes, (Tech. Paper SPE 13215) SPEFE Feb. 86, 89-103
Injection well logging using viscous EOR fluids, (Tech. Paper SPE 13143) SPEFE Jun. 86, 300-308

Oil-Base Muds
Detection of pay zones during drilling: development of fluorimetric method for, (Tech. Paper SPE 13005) SPEFE Dec. 86, 595-602

P

Performance Predictions
Single-well gas condensate systems: proof of two-phase steady-state theory for flow through porous media, (Tech. Paper SPE 14472) SPEFE Dec. 86, 603-608
Permeability
Low: sandstones; effect of fluid, confining pressure, and temperature on absolute permeabilities, (Tech. Paper SPE 13093) SPEFE Aug. 86, 413-423
Low: vertical interference testing across zone of, (Tech. Paper SPE 13251) SPEFE Oct. 86, 497-510
Of submillidarcy sandstone reservoirs: log analysis techniques for quantifying, (Tech. Paper SPE 13880) SPEFE Dec. 86, 609-622
Of tight sandstone cores: laboratory drying procedures, (Tech. Paper SPE 11622) SPEFE Feb. 86, 16-22
Stress-dependent: effect on gas production and well testing, (Tech. Paper SPE 11220) SPEFE Jun. 86, 227-235
Petrophysics
And mineralogical data: reservoir characterization of Tuscaloosa sand by, (Tech. Paper SPE 14274) SPEFE Dec. 86, 584-594
Phase Behavior
Equilibrium concepts: proof of two-phase steady-state theory for flow through porous media, (Tech. Paper SPE 14472) SPEFE Dec. 86, 603-608
Pinchout
And faults: modeling of; and local mesh refinement, (Tech. Paper SPE 13524) SPEFE Jun. 86, 275-285
Poland
Lublin synclinorium: hydrodynamic conditions of hydrocarbon accumulation exemplified by carboniferous formation, (Tech. Paper SPE 13345) SPEFE Jun. 86, 286-294
Polyacrylamide
Solutions: mechar .cal degradation in core plugs from several carbonate reservoirs, (Tech. Paper SPE 12651) SPEFE Apr. 86, 139-150
Porosity
Measurement by quantitative image analysis, (Tech. Paper SPE 13133) SPEFE Aug. 86, 389-398
Primary: preservation through hydrocarbon entrapment during burial, (Tech. Paper SPE 13954) SPEFE Jun. 86, 295-299
Triple system: for representing naturally fractured reservoirs, (Tech. Paper SPE 13409) SPEFE Apr. 86, 113-127
Porous Media
Flow through: proof of two-phase steady-state theory, (Tech. Paper SPE 14472) SPEFE Dec. 86, 603-608
Transparent, three-dimensional: distribution of oil, water, and quartz grains in; new technique for visualizing, (Tech. Paper SPE 13349) SPEFE Apr. 86, 205-208
Potential Gas Committee
Analysis of two-phase flow problems, (Tech. Paper SPE 10223) SPEFE Apr. 86, 151-164
Pressure Behavior
Confining: combined with fluid and temperature; effect on absolute permeabilities of low-permeability sandstones, (Tech. Paper SPE 13093) SPEFE Aug. 86, 413-423
Decline in fracturing: general analysis with application to three models, (Tech. Paper SPE 12941) SPEFE Dec. 86, 571-583
Drop across core during two-phase immiscible displacement: test for detecting rock property nonuniformities; author's reply to discussion of, (Rebuttal SPE 15842) SPEFE Aug. 86, 425
Drop across core during two-phase immiscible displacement: test for detecting rock property nonuniformities; discussion of, (Discussion SPE 15342) SPEFE Aug. 86, 424-425
Using simultaneous with downhole flow-rate measurements to improve analysis of well tests, (Tech. Paper SPE 12958) SPEFE Jun. 86, 217-226
Pressure Buildup
Analysis of tests with short producing time, (Tech. Paper SPE 11083) SPEFE Aug. 86, 363-371
Analysis of variable-rate data using Duhamel's principle, (Tech. Paper SPE 13080) SPEFE Oct. 86, 453-469
Data: analysis influenced by wellbore phase redistribution, (Tech. Paper SPE 12782) SPEFE Oct. 86, 435-452
Test: in nonlinear inversion of pressure-transient data, (Tech. Paper SPE 12848) SPEFE Aug. 86, 355-362
Tests: effect of stress-dependent permeability, (Tech. Paper SPE 11220) SPEFE Jun. 86, 227-235
Pressure Drawdown
Analysis of variable-rate data using Duhamel's principle, (Tech. Paper SPE 13080) SPEFE Oct. 86, 453-469
Pressure Falloff Tests
Nonisothermal effects during, (Tech. Paper SPE 11137) SPEFE Feb. 86, 53-63
Pressure Transients
Analysis in poorly consolidated reservoirs, (Tech. Paper SPE 10086) SPEFE Dec. 86, 557-570
Data: nonlinear inversion of, (Tech. Paper SPE 12848) SPEFE Aug. 86, 355-362
Prefracture testing: tight gas reservoir, (Tech. Paper SPE 12918) SPEFE Apr. 86, 128-138
Prefracture testing: tight gas reservoirs; author's reply to discussion of, (Rebuttal SPE 15989) SPEFE Dec. 86, 1
Prefracture testing: tight gas reservoirs; discussion of, (Discussion SPE 15913) SPEFE Dec. 86, 628-629
Prefracture testing: tight gas reservoirs; discussion of, (Discussion SPE 15964) SPEFE Dec. 86, 630-631
Testing of fractured wells: application of pressure-derivative function, (Tech. Paper SPE 13056) SPEFE Oct. 86, 470-480
Tests: analysis of naturally fractured reservoirs; triple-porosity system for representing, (Tech. Paper SPE 13409) SPEFE Apr. 86, 113-127
Propping Agent
Influence on performance of finite-conductivity, vertically fractured wells; single-layer reservoirs, (Tech. Paper SPE 11029) SPEFE Aug. 86, 399-412
Pulse Testing
In reservoirs with cross flow between contiguous layers: interpretation of, (Tech. Paper SPE 11963) SPEFE Oct. 86, 511-520

Q

Quartz
Grains: distribution with oil and water in a transparent, three-dimensional, porous medium; new technique for visualizing, (Tech. Paper SPE 13349) SPEFE Apr. 86, 205-208

R

Relative Permeability
Gas-condensate: determination on whole cores under reservoir conditions, (Tech. Paper SPE 11493) SPEFE Feb. 86, 9-15
Reservoir Rocks
Characterization of pore space by quantitative image analysis, (Tech. Paper SPE 13133) SPEFE Aug. 86, 389-398
Reservoir Simulation
Of faults and pinchouts: and local mesh refinement, (Tech. Paper SPE 13524) SPEFE Jun. 86, 275-285
Reservoirs
Carbonate: mechanical degradation of polyacrylamide solutions in core plugs from, (Tech. Paper SPE 12651) SPEFE Apr. 86, 139-150
Characterization: by mineralogical and petrophysical data; Tuscaloosa s and, (Tech. Paper SPE 14274) SPEFE Dec. 86, 584-594
Layered: well testing and analysis techniques for, (Tech. Paper SPE 13081) SPEFE Aug. 86, 342-354

Multilayer commingled: analysis of finite-conductivity fractures intercepting, (Tech. Paper SPE 11030) SPEFE Jun. 86, 259-274
Poorly consolidated: pressure transient analysis in, (Tech. Paper SPE 10086) SPEFE Dec. 86, 557-570
Single-layer: performance of finite-conductivity, vertically fractured wells, (Tech. Paper SPE 11029) SPEFE Aug. 86, 399-412
Submillidarcy sandstone: log analysis techniques for quantifying permeability, (Tech. Paper SPE 13880) SPEFE Dec. 86, 609-622
With crossflow between contiguous layers: interpretation of pulse tests, (Tech. Paper SPE 11963) SPEFE Oct. 86, 511-520

Retrograde Condensation
Relative permeability: determination on whole cores under reservoir conditions, (Tech. Paper SPE 11493) SPEFE Feb. 86, 9-15

Rock Properties
Detecting nonuniformities in core samples: test for; author's reply to discussion of, (Rebuttal SPE 15842) SPEFE Aug. 86, 425
Detecting nonuniformities in core samples: test for; discussion of, (Discussion SPE 15342) SPEFE Aug. 86, 424-425

Rocky Mountain Area
Sandstone core, tight: permeability of and laboratory drying procedures, (Tech. Paper SPE 11622) SPEFE Feb. 86, 16-22

S

Salinity
Of resident brine: and resident water saturation; alcohol extraction technique for in-situ determination of, (Tech. Paper SPE 12094) SPEFE Aug. 86, 372-382

Salt Water Muds
Carbonates drilled with: EPT interpretation in, (Tech. Paper SPE 13192) SPEFE Oct. 86, 521-531

Sand
Discrimination of crude oil and water with NMR imaging, (Tech. Paper SPE 13401) SPEFE Feb. 86, 31-34
Tuscaloosa: reservoir characterization by mineralogical and petrophysical data, (Tech. Paper SPE 14274) SPEFE Dec. 86, 584-594

Sandstone
Berea: surface composition of, (Tech. Paper SPE 11972) SPEFE Feb. 86, 23-30
Coddell: Weld and Larimer Counties Co.: geological aspects of, (Tech. Paper SPE 13885) SPEFE Dec. 86, 623-627
Low-permeability: effect of fluid, confining pressure, and temperature on absolute permeabilities of low-permeability sandstones, (Tech. Paper SPE 13093) SPEFE Aug. 86, 413-423
Nugget: estimation of in-situ stresses from ultrasonic measurements, (Tech. Paper SPE 12850) SPEFE Oct. 86, 532-538
Submillidarcy reservoirs: log analysis techniques for quantifying permeability, (Tech. Paper SPE 13880) SPEFE Dec. 86, 609-622
Tight core: permeability of and laboratory drying procedures, (Tech. Paper SPE 11622) SPEFE Feb. 86, 16-22

Scale
Pore: gravitational effects during diffusional mass transfer, (Tech. Paper SPE 12679) SPEFE Apr. 86, 184-192

Scanning Electron Microscope
Characterization of pore space: by quantitative image analysis, (Tech. Paper SPE 13133) SPEFE Aug. 86, 389-398
Examination by: Berea sandstone; surface composition, (Tech. Paper SPE 11972) SPEFE Feb. 86, 23-30

Sensitivity Analysis
Type-curve matching techniques: error sensitivity numbers, (Tech. Paper SPE 10087) SPEFE Feb. 86, 64-74

Simulation
Numerical: of cement bond log; fluid-compensated, (Tech. Paper SPE 13044) SPEFE Aug. 86, 335-341
Numerical: of transient behavior of coal-seam degasification wells, (Tech. Paper SPE 12258) SPEFE Apr. 86, 165-183
Of injection and falloff tests: nonisothermal effects during, (Tech. Paper SPE 11137) SPEFE Feb. 86, 53-63
One-phase numerical: pulse tests interpretation; reservoirs with crossflow between contiguous layers, (Tech. Paper SPE 11963) SPEFE Oct. 86, 511-520

Skin Effect
And wellbore storage: effects of vertical-permeability testing, (Tech. Paper SPE 13250) SPEFE Oct. 86, 481-496
Finite-conductivity vertical fractures: new approximate analytic solution, (Tech. Paper SPE 12013) SPEFE Feb. 86, 75-88
Injection and falloff tests: nonisothermal effects during, (Tech. Paper SPE 11137) SPEFE Feb. 86, 53-63

Spacing
Variable fracture: effects resulting from; estimating subsurface fracture density in core, (Tech. Paper SPE 13300) SPEFE Jun. 86, 249-258

Storage
Wellbore: and skin; effects on vertical-permeability testing, (Tech. Paper SPE 13250) SPEFE Oct. 86, 481-496
Wellbore: finite-conductivity vertical fractures; new approximate analytic solution, (Tech. Paper SPE 12013) SPEFE Feb. 86, 75-88

Stresses
Dependent permeability: effect on gas production and well testing, (Tech. Paper SPE 11220) SPEFE Jun. 86, 227-235
In-situ: around wellbore; estimation from ultrasonic measurements, (Tech. Paper SPE 12850) SPEFE Oct. 86, 532-538
In-situ: characterized by fluid flow and structural response modeling; mechanics of hydraulic fracturing, (Tech. Paper SPE 10846) SPEFE Jun. 86, 309-318

Subsurface
Estimating fracture density in core: effects resulting from variable fracture spacing, (Tech. Paper SPE 13300) SPEFE Jun. 86, 249-258

Surface
Composition: Berea sandstone, (Tech. Paper SPE 11972) SPEFE Feb. 86, 23-30

T

Temperature
Combined with fluid and confining pressure: effect on absolute permeabilities of low-permeability sandstones, (Tech. Paper SPE 13093) SPEFE Aug. 86, 413-423

Testing
Biaxial data: estimation of in-situ stresses from ultrasonic measurements, (Tech. Paper SPE 12850) SPEFE Oct. 86, 532-538
Buildup data: analysis of tests with short producing time, (Tech. Paper SPE 11083) SPEFE Aug. 86, 363-371
Fluid: combined with confining pressure and temperature; effect on absolute permeabilities of low-permeability sandstones, (Tech. Paper SPE 13093) SPEFE Aug. 86, 413-423
Of well: and analysis techniques for layered reservoirs, (Tech. Paper SPE 13081) SPEFE Aug. 86, 342-354
Prefracture: tight gas reservoir, (Tech. Paper SPE 12918) SPEFE Apr. 86, 128-138
Prefracture: tight gas reservoirs; author's reply to discussion of, (Rebuttal SPE 15989) SPEFE Dec. 86, 1
Prefracture: tight gas reservoirs; discussion of, (Discussion SPE 15913) SPEFE Dec. 86, 628-629
Prefracture: tight gas reservoirs; discussion of, (Discussion SPE 15964) SPEFE Dec. 86, 630-631

Pressure transient: of fractured wells; application of pressure-derivative function, (Tech. Paper SPE 13056) SPEFE Oct. 86, 470-480
To detect rock property nonuniformities in core samples; author's reply to discussion of, (Rebuttal SPE 15842) SPEFE Aug. 86, 425
To detect rock property nonuniformities in core samples; discussion of, (Discussion SPE 15342) SPEFE Aug. 86, 424-425
Vertical interference: across low-permeability zone, (Tech. Paper SPE 13251) SPEFE Oct. 86, 497-510
Vertical-permeability: effects of wellbore storage and skin, (Tech. Paper SPE 13250) SPEFE Oct. 86, 481-496
Well: determination of infinite-acting period for analysis, (Tech. Paper SPE 10763) SPEFE Aug. 86, 383-388
Well: effect of stress-dependent permeability, (Tech. Paper SPE 11220) SPEFE Jun. 86, 227-235
Wells: improving analysis by using simultaneous downhole flow-rate and pressure measurements, (Tech. Paper SPE 12958) SPEFE Jun. 86, 217-226

Thermal-Neutron Decay Time
Computing environmental effects using Monte Carlo techniques, (Tech. Paper SPE 10293) SPEFE Feb. 86, 35-42

Transient Flow
Pressure analysis: in poorly consolidated reservoirs, (Tech. Paper SPE 10086) SPEFE Dec. 86, 557-570

Transients
Behavior of coal-seam degasification wells: numerical simulation of, (Tech. Paper SPE 12258) SPEFE Apr. 86, 165-183

Type Curves
Analysis of interference data: highly heterogeneous naturally fractured geothermal reservoir, (Tech. Paper SPE 13252) SPEFE Jun. 86, 236-248
Analysis of pressure-transient tests: effect of stress-dependent permeability, (Tech. Paper SPE 11220) SPEFE Jun. 86, 227-235
For vertical-permeability testing: effects of wellbore storage and skin, (Tech. Paper SPE 13250) SPEFE Oct. 86, 481-496
Matching techniques with error sensitivity numbers, (Tech. Paper SPE 10087) SPEFE Feb. 86, 64-74
Matching: analysis of pressure buildup data influenced by wellbore phase redistribution, (Tech. Paper SPE 12782) SPEFE Oct. 86, 435-452
Matching: using simultaneous downhole flow-rate and pressure measurements to improve analysis of well tests, (Tech. Paper SPE 12958) SPEFE Jun. 86, 217-226
Pressure-transient testing: of fractured wells; application of pressure-derivative function, (Tech. Paper SPE 13056) SPEFE Oct. 86, 470-480

U

Utah
Anschutz Ranch East field: eight-well interference test, (Tech. Paper SPE 11968) SPEFE Dec. 86, 547-556

V

Viscosity
Compressibility product: analyzing prefracture testing in tight gas reservoirs, (Tech. Paper SPE 12918) SPEFE Apr. 86, 128-138
Compressibility product: analyzing prefracture testing in tight gas reservoirs; author's reply to discussion of, (Rebuttal SPE 15989) SPEFE Dec. 86, 1
Compressibility product: analyzing prefracture testing in tight gas reservoirs; discussion of, (Discussion SPE 15913) SPEFE Dec. 86, 628-629
Compressibility product: analyzing prefracture testing in tight gas reservoirs; discussion of, (Discussion SPE 15964) SPEFE Dec. 86, 630-631

W

Water
And crude oil: discrimination in sand and in bore cores with NMR imaging, (Tech. Paper SPE 13401) SPEFE Feb. 86, 31-34
Distribution with oil and quartz grains in a transparent, three-dimensional, porous medium: new technique for visualizing, (Tech. Paper SPE 13349) SPEFE Apr. 86, 205-208
Resident saturation: and resident brine salinity; alcohol extraction technique for in-situ determination of, (Tech. Paper SPE 12094) SPEFE Aug. 86, 372-382

Well Logging
Fluid-compensated cement bond log, (Tech. Paper SPE 13044) SPEFE Aug. 86, 335-341
Injection using viscous EOR fluids, (Tech. Paper SPE 13143) SPEFE Jun. 86, 300-308
Log analysis techniques for quantifying permeability of submillidarcy sandstone reservoirs, (Tech. Paper SPE 13880) SPEFE Dec. 86, 609-622
Thermal neutron decay time: computing environmental effects using Monte Carlo techniques, (Tech. Paper SPE 10293) SPEFE Feb. 86, 35-42

Well Logs
Density, neutron, and electromagnetic propagation: triple-fluid evaluations, (Tech. Paper SPE 13301) SPEFE Apr. 86, 193-204

Wellbore Mechanics
Fluid effects: response of fluid-compensated cement bond log, (Tech. Paper SPE 13044) SPEFE Aug. 86, 335-341
Phase redistribution: analysis of pressure buildup data influenced by, (Tech. Paper SPE 12782) SPEFE Oct. 86, 435-452
Poorly consolidated reservoirs: pressure transient analysis in, (Tech. Paper SPE 10086) SPEFE Dec. 86, 557-570
Storage and skin: effects on vertical-permeability testing, (Tech. Paper SPE 13250) SPEFE Oct. 86, 481-496

Wettability
Crude-oil-induced changes: effect on oil recovery, (Tech. Paper SPE 13215) SPEFE Feb. 86, 89-103

Wyoming
Anschutz Ranch East field: eight-well interference test, (Tech. Paper SPE 11968) SPEFE Dec. 86, 547-556

X

X-Ray Photoelectron Spectroscopy Analysis (XPS)
Surface composition determination: Berea sandstone, (Tech. Paper SPE 11972) SPEFE Feb. 86, 23-30
